

Points (1pt Each)	User Story	Criteria (Out of 10)	
1	It is done when I have a fully functioning password generator.	Delivery	10 Is the assignment on time?
1	It is done when I can choose uppercase letters, lowercase letters, numbers, AND/OR symbols for my password.	Program Specifications/Correctness	10 Are there errors and does it meet specifications?
1	It is done when I can choose between having 8 to 124 characters in my password.	Documentation	10 No errors, and the code is well-commented.
0	It should have the error handling to show that it cannot generate a password without the user choosing at least one character choice.	Reusability/DRY	10 No errors, code uses the best approach for this program and code doesn't repeat.
1	It must have the password appear on the page.	Score out of 40	40
1	You cannot use alert boxes for this.	Score (Out of 48)	46
1	You will have a functioning stylesheet.	ADD EXTRA CREDIT	49
Score out of 8	6		
Extra Credit (Out of 5)	3		
Comments			
	Very nice work on this one. The only thing missing was the error handling to let the user know they need to choose within the choices set by the application. Overall, good job!
